Object : looking for a job in Denmark.

Dear Sir, Madam

I'm a french golf gardener who wants to find a job in a Danish golf course. I'm currently working with a permanent contract at Golf Club de l'Hirondelle in France. Recently I did an internship on 6 golf courses in Denmark for 2 weeks, (Asserbo, Hillerød, Rungsted, Smørum, Furesø, Copenhagen), to learn more about your country and your way of working. I have been working since 3 years on a golf course, I really enjoy my job, especially when I see the result. My favorite activity is cutting fairways, because when I finished the cut, it looks very good when it's well done. You can be sure that I have the basic skills for the daily maintenance on a golf course. I usually cut greens and rough and all the others tasks to do on a course. I'm versatile. I'm also interested by the watering but I have to progress on it. I followed a training course about that, during 3 days, and I also practice on our golf course when we have sprinklers to change. I would like to continue this training to acquire the skill of a hydrant man.

Why Denmark? Since I work in the golf environment, I have the opportunity to move all over the world, and the Scandinavian countries attract me a lot since a long time. I know that the Danish golf courses are renowned for their respect of the environment and their ecology and I'm sensitive to all this, and more precisely by the protection of pollinating insects and plants. The climate doesn't scare me, I did my military classes in the mountains, in winter, so I'm comfortable with the cold. I think the Scandinavian countries are among the most beautiful countries in the world by their landscapes and I would like to live in one of them. And after my internship, I saw it all by my own eyes and it made me even more want to come. I will be very proud to live and work here, in Denmark.

I know that will be difficult because of the languages, but I have some knowledges in English. I supply a quality work, I'm motivated and invested in my work (I also play golf). In a technical job as ours, I think that it can be enough to show you that you can trust me.

Enclosed is a copy of my resume, which provides more details about my qualifications. Hoping that my profil gets your attention, I'm at your disposition for more information about me.

Sincerely,
PONSART Paul
